

Truckers for Safer Highways wholeheartedly endorses the implementation of Chad's Law proposed by Member Guy Bourgouin.

This legislation marks a crucial step towards deterring drivers from overtaking in hazardous locations, a practice that poses significant risks on our highways. Regrettably, we frequently witness such perilous maneuvers by drivers of all kinds, including fellow truckers.

Chad's Law promises to equip law enforcement with enhanced tools to address and rectify unsafe driving behaviors, introducing additional consequences for those who recklessly endanger themselves and others on our roads.

It is worth noting that similar laws are already in effect in numerous Canadian provinces and large portions of the United States. The question arises as to why Ontario has yet to align itself with these neighboring jurisdictions to maintain the highest safety standards for all road users.

Truckers for Safer Highways remains steadfast in its commitment to fostering a secure driving environment, and we believe the adoption of Chad's Law is a crucial stride towards achieving this shared goal. We urge all Members to support this initiative to ensure the safety of our highways and the well-being of all those who travel on them.

Be safe out there,

Travis McDougall
